

DESCRIPTION

Combination unit can be used as step to place child at proper height or as a seat to permit baptism of adults from a seated position. May also be used when minister officiates from dry area behind the baptistry. Constructed of molded fiberglass with non-skid surfaces on step area. Furnished with chrome plated toe-bar and suction cup anchoring.

INSTALLATION

Unit attaches to floor of baptistry with suction cups. Easily removed when not needed.

OPTIONS

Combination child's step and seat is available in all standard baptistry colors.
